

The screenshot shows the NetView interface for Polaris Connect. On the left is a sidebar with a 'NetView' label and a menu containing 'Inquiry' (with a sub-menu for 'Parts Locator', 'Get Vehicle Specs', 'Get Service Plan Information', 'Get Vehicle Service History', and 'Get Promotions'), 'Polaris Connect' (with a sub-menu for 'Dealer Settings'), and 'Upload Parts Inventory'. The main area is titled 'Parts Locator' and features a search bar with 'Search Type' set to 'Polaris'. Below the search bar is a table with columns: Part Number, Quantity, Description, MSRP, Availability, Reason, Superseding, and Available Qty. The table is currently empty, displaying 'No Records to Display.' and 'No Items to display' at the bottom. A 'MENU' button is visible on the right side of the interface.

Polaris Connect (POL) is an HBS Systems NetView Connect program designed specifically for Polaris dealers. The program allows you to look up information about Polaris parts as well as information about Polaris vehicles your dealership has serviced.

To access this program, select the following from the menu:

Communications / Netview Connect / Polaris Connect

Or type POL in the Shortcuts Bar

The screenshot shows the NetView interface with the Polaris Connect application. The left sidebar contains a menu with options like 'Inquiry', 'Parts Locator', 'Get Vehicle Specs', 'Get Service Plan Information', 'Get Vehicle Service History', 'Get Promotions', 'Polaris Connect', 'Dealer Settings', and 'Upload Parts Inventory'. The main content area is titled 'Parts Locator' and features a search bar with 'Polaris' entered. Below the search bar is a table with columns: Part Number, Quantity, Description, MSRP, Availability, Reason, Superseding, and Available Qty. The table is currently empty, showing 'No Records to Display.'

Activating Polaris Connect—Dealer Settings Tab

The first time you open Polaris Connect for your dealership, you will need to activate your credentials in order to use the program. To do so, you will need to open the Dealer Settings tab (see below) and enter your Polaris Connect dealer credentials in the fields provided.

The screenshot shows the NetView interface with the Polaris Connect application. The left sidebar is the same as the previous screenshot. The main content area is titled 'Dealer Settings' and contains a form with the following fields: Dealer Number (5432100), Authorization ID (svcmhbsystems), User ID (HBSsystems), and Password (eQ5UJ6LWlqpcv4w). There is a checkbox for 'Automatically upload Parts inventory nightly' which is unchecked. Below this is a 'Server' section with radio buttons for 'Test' (selected) and 'Production'. At the bottom right of the form are 'Clear' and 'Save' buttons.

Dealer Number

Enter your Polaris dealer number here.

Authorization ID

Enter your authorization ID for Polaris Connect here.

User ID

Enter your Polaris user ID here.

Password

Enter your password for Polaris here.

Automatically upload Parts inventory nightly

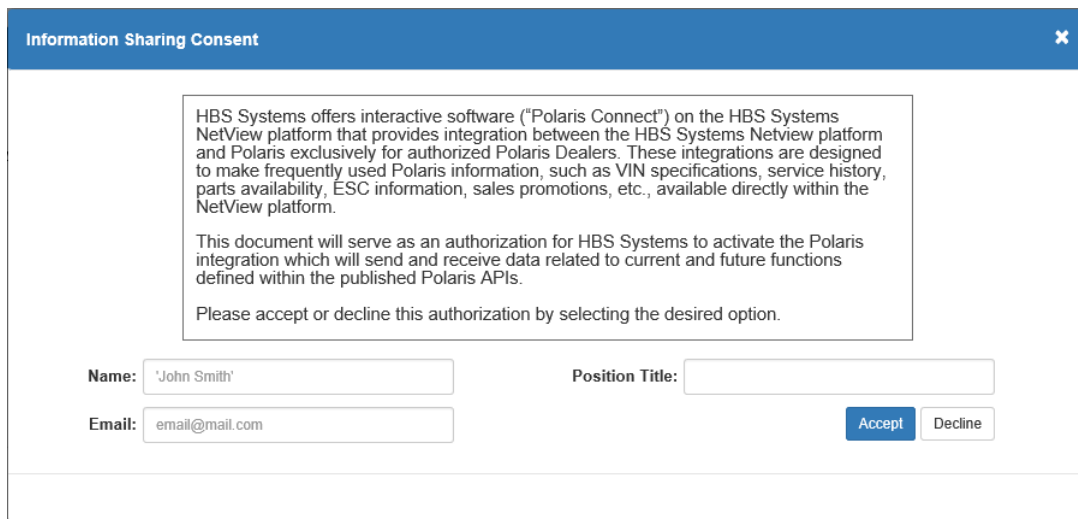

If you want the program to automatically update the Polaris parts inventory every night, make sure this box is checked.

Server

Make sure the server is set to **Production** instead of Test; otherwise, you will be blocked from using the program features.

Save

When you are ready, click the **Save** button to save your dealer information. The following window will then appear:

The dialog box has a blue header bar with the text "Information Sharing Consent" and a close button (X) on the right. The main content area contains a text box with the following text: "HBS Systems offers interactive software ("Polaris Connect") on the HBS Systems NetView platform that provides integration between the HBS Systems Netview platform and Polaris exclusively for authorized Polaris Dealers. These integrations are designed to make frequently used Polaris information, such as VIN specifications, service history, parts availability, ESC information, sales promotions, etc., available directly within the NetView platform. This document will serve as an authorization for HBS Systems to activate the Polaris integration which will send and receive data related to current and future functions defined within the published Polaris APIs. Please accept or decline this authorization by selecting the desired option." Below the text box are three input fields: "Name:" with the value "John Smith", "Position Title:" which is empty, and "Email:" with the value "email@mail.com". To the right of these fields are two buttons: "Accept" (blue) and "Decline" (white with blue border).

To use Polaris Connect, you must authorize HBS Systems to activate the program and consent to letting the program share information between your system and Polaris. Enter your name, your contact email address, and your position title at your dealership in the fields provided.

Click **Accept** to authorize the program. A copy of the authorization will then be sent to both your email and HBS Systems' Support department. You will now be able to utilize Polaris Connect with your NetView system. Additionally, if you did not previously check "Automatically upload Parts inventory nightly," accepting the contract will automatically check the box.

Note that this window will always appear when you click **Save** in the Dealer Settings tab, so you will be required to re-accept the contract every time you change your dealer information. Each time, the program will send a copy of the authorization to both your email and the HBS Support department, so both parties will always have an up-to-date version of the contract on file.

Using Polaris Connect—Inquiry Tabs

Polaris Connect is primarily an **Inquiry** program that allows you to look up information about Polaris parts, service plans, and vehicles. Each tab underneath the Inquiry tab header holds a different inquiry type.

Parts Locator Tab

The Parts Locator inquiry tab allows you to look up information about Polaris parts.

Search Type/Part Number

Use this drop-down menu to set the type of parts search you want to make, then enter the part number(s) you want to locate in the field to the right. There are three search types, each of which will provide a different set of information: Polaris, Dealer, and Dealer Radius.

Polaris Search

To simply look up Polaris parts, use the **Polaris** search type. With this type, you will be able to enter up to 200 part numbers in the Part Number search field (see below image).

After you enter a part number, click either the “Enter” key or the **Submit** button to search for it. The results grid below will add an entry for each part number as you submit it. You can also then remove individual parts from the search results by clicking on the little “x” next to the number (see below image), or you can clear them all using the **Clear** button.

NOTE: Polaris Search is the only search type that shows a Part Number column in the Search Results Grid. For the other two search types, a Dealer Name column replaces it.

Dealer Search

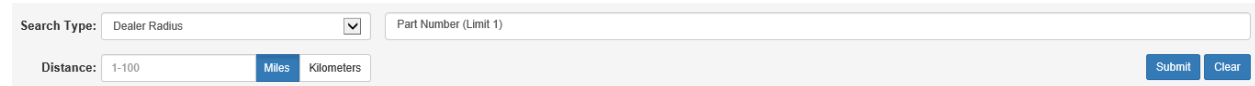

To look up which Polaris dealers carry a specific part, use the **Dealer** search type. You will only be able to search for a single part number using this type (see below image).

A screenshot of the 'Dealer Search' form. It features a 'Search Type:' dropdown menu set to 'Dealer' and a 'Part Number (Limit 1)' text input field.

After you enter a part number, click either the "Enter" key or the **Submit** button to search for it. The results grid below will add an entry for each part number as you submit it. You can clear the Part Number field for a new search by either clicking on the little "x" next to the number or using the **Clear** button.

Dealer Radius/Distance

To see if there is a Polaris dealer within a certain distance from your dealership that carries a specific part, use the **Dealer Radius** search type. You will only be able to search for a single part number using this type, but you will also have to enter the distance from your dealership (in miles or kilometers) you want the search to cover (see below image). You can search for up to 100 miles or 160 kilometers.

A screenshot of the 'Dealer Radius/Distance' form. It includes a 'Search Type:' dropdown menu set to 'Dealer Radius', a 'Part Number (Limit 1)' text input field, a 'Distance:' section with a '1-100' input and 'Miles'/'Kilometers' radio buttons, and 'Submit' and 'Clear' buttons.

Part Number	Quantity	Description	MSRP	Availability	Reason	Superseding	Available Qty

Search Results Grid-Definitions

Columns

Part Number

This column shows the part number for the entry, and only appears when you use the **Polaris** search type (as that is the only search that allows for more than 1 part number to appear in the grid).

Dealer Name

This column (see below image) shows the dealer name for the entry, and only appears when you use the **Dealer** and **Dealer Radius** search types (as both types only allow for a single part search, but can show multiple dealers).

Dealer Name	Quantity	Description	MSRP	Availability	Reason	Superseding	Available Qty
-------------	----------	-------------	------	--------------	--------	-------------	---------------

Quantity

This column shows the part's package quantity.

Description

This column shows the part's description.

MSRP

This column shows the part's MSRP (in the manufacturer's chosen currency type—see "Further Detail Fields" for more information).

Availability

This column shows the part's stock status (in stock, out of stock, etc.).

Reason

If the part is out of stock, this column may show a reason why that is.

Superseding

If the part number has been superseded, this column shows the superseding part number. Additionally, if you search for a superseded part number, the search will automatically add the superseding part number to the results grid below the superseded number, so you do not have to search for it separately.

Available Qty

This column shows the part's available quantity, in general or at the specific dealership (depending on the search type used).

Further Detail Fields

You can view more details about an individual part in the grid by clicking the green "+" sign on the far left of the grid entry. This will change the "+" sign to a "-" sign; click the "-" sign to hide the details again.

Supplying Party ID

This shows the part's manufacturer ID, which will generally be "PL" for Polaris.

Supplying Party Location ID

This shows the part's location ID, or where the manufacturer is currently keeping the part.

Class Code

This shows the part's class code.

Hazmat Indicator

This shows if this is a hazardous part or not (by displaying "true" or "false").

Package Quantity

This shows the part's package quantity, which will be the same as the value for the part in the Quantity column.

UOM Code

This shows the part's UOM code.

Order Restriction

This shows if there are any restrictions on the quantity of the part number that you can order.

Eligible For Return

This shows if the part is eligible for return or not.

Currency

This shows what currency the part's pricing shows in (such as USD).

Net Price

This shows the part's net price (in the selected currency).

Search Type: Polaris

Part Number	Quantity	Description	MSRP	Availability	Reason	Superseding	Available Qty

Showing 11 Item(s)

Further Detail Fields (cont.)

Childline Pricing

This column shows the part's childline pricing (in the selected currency).

Status

This shows whether or not the part number was successfully returned by the search. If the search successfully located the part number, it will read "Success." If the part number was not found, it may say something else; for example, if the number entered is not a valid part number, this field will say, "Invalid Part."

No. of Packages

This shows the number of packages available for the part number. If the available quantity is identical to the package quantity, then this field will show "1," as there is only one package available. However, if the available quantity is greater than the package quantity, this number may be higher.

Min. Buy Qty.

This shows if there is a required minimum purchase quantity of the part.

Get Vehicle Specs Tab

The Get Vehicle Specs inquiry tab allows you to look up the specifications for either a specific vehicle model or an individual vehicle.

Making a Vehicle Spec Search

Use the drop-down menu at the top of the screen to select whether to search by **model number (Model)** or **vehicle ID (Vehicle ID)**. Enter the desired number in the search field to the right, then click the **Submit** button or hit the "Enter" key. The Vehicle Details fields below will populate with the model or vehicle's details. **NOTE:** Certain fields will only fill if you use the **Vehicle ID** search, as they show data related to an individual vehicle and so would not apply to a model number. The field descriptions below will note which fields only appear for the Vehicle ID search.

Field Descriptions

Model

This field shows the model number.

Vehicle ID

This field shows the vehicle ID. **NOTE:** Only appears for a Vehicle ID search.

Year

This field shows the model year.

Description

This field shows the model description.

Product Line

This field shows the model's product line.

The screenshot shows the 'Vehicle Specs' page in the Polaris Connect Netview interface. On the left is a sidebar with navigation links: 'Inquiry' (with sub-links: Parts Locator, Get Vehicle Specs, Get Service Plan Information, Get Vehicle Service History, Get Promotions), 'Polaris Connect' (with sub-link: Dealer Settings), and 'Upload Parts Inventory'. The main content area has a 'Vehicle Specs' header with a search bar for 'Vehicle ID' and a 'Submit' button. Below this is a 'Vehicle Details' section with a table of information:

Vehicle Details		
Model: V13DW36NX	Vehicle ID: 5VPDW36N7D3018540	Year: 2013
Description: Cross Country ABS, Midnight Metallic Flame	Product Line: TOURING	Sales Code: Used
Displacement: 1731.00	Vehicle Note: True	Vehicle Class: VIC
Manufacturer: Polaris	Model Group: CROSS COUNTRY	Model Class: HARD BAG FAIRING
Series Code: BAGGER	Weight: 765.000	Vehicle Desc: Cross Country ABS, Midnight Metallic Flame
Production Date: 11/08/2012	Warranty Start Date: 05/11/2013	Vehicle Sale Date: 05/11/2013
Engine Desc: NA	Engine Serial: 0120467702063	

At the bottom of the table is a pagination bar showing '1 - 1 of 1 Items'.

Field Descriptions (*cont.*)

Sales Code

This field shows the sales code for the model/vehicle (the exact code will vary depending on if you did a Model or Vehicle ID search).

Displacement

This field shows the model's displacement value.

Vehicle Note

This field shows if there is a note on the vehicle. **NOTE:** Only appears for a Vehicle ID search.

Vehicle Class

This field shows the model's vehicle class.

Manufacturer

This field shows the manufacturer name, which will almost always be Polaris.

Model Group

This field shows the model group.

Model Class

This field shows the model class.

Series Code

This field shows the model's series code.

Weight

This field shows the weight of the model/vehicle (vehicles of a specific model will share that model's weight value)

Vehicle Desc

This field shows the vehicle description, which will generally be the same as the model description.

Production Date

This field shows the vehicle's production date. **NOTE:** Only appears for a Vehicle ID search.

Warranty Start

This field shows the warranty start date for the vehicle. **NOTE:** Only appears for a Vehicle ID search.

Vehicle Sale Date

This field shows the sale date for the vehicle, if applicable. **NOTE:** Only appears for a Vehicle ID search.

Engine Desc

This field shows a description for the model/vehicle's engine, if available.

Engine Serial

This field shows the engine's serial number. **NOTE:** Only appears for a Vehicle ID search.

Options

This button is reserved for future use.

Get Service Plan Information Tab

The Get Service Plan Information inquiry tab allows you to look up service plan information for a specific vehicle.

Vehicle ID

Enter the vehicle ID in this field.

Submit

Click this button to begin your inquiry. The service plan information for the vehicle will populate the sections below.

Promotion Results Display

The model's available promotions will show in blocks: a header to indicate the promotion name, and sections below it displaying the details of the different promotion types available. Polaris makes up to 5 promotion types available for their models:

- **Spiff**
- **ESC**
- **Rebate**
- **Finance**
- **Extended Warranty**

Upload Parts Inventory

This feature appears on the left side of the Polaris Connect screen, below the tab listings. Click on it to manually update the parts inventory from Polaris at any time. **NOTE:** If you have the "Automatically upload Parts inventory nightly" option selected in the Dealer Settings tab, the program will automatically update the parts inventory every night.
